

SECRETARY DANIELS TO THROW F-4 INTO NAVAL SCRAP HEAP

Officials Decide to Make No Attempt to Repair Ill-Fated Submarine.

OTHER F-BOATS RENOVATED

Vessels Withdrawn From Service to Permit Overhauling to Prevent Disaster.

Secretary of the Navy Daniels and navy officials have decided to make no attempt to repair the F-4. The submarine will be sent to the scrap heap.

For the present, the rest of the F boats have been withdrawn from service. They are to be overhauled and made more seaworthy. New engines will be put into them and, profiting by the lesson of the F-4, new battery linings like those in submarines of new types will be employed.

The new battery linings are to prevent repetition of the trouble which caused the loss of the F-4. This, according to the naval board, which investigated the disaster, was corrosion of a rivet in one of the ballast tanks which permitted sea water from the tank to penetrate to the exterior of the submarine's storage batteries and thence to the interior of the tank.

According to Henry R. Carse, president of the Electric Boat Company, which built the vessel, however, improper handling and not corrosion of a rivet caused the disaster. No attempt is to be made to fix personal responsibility for the loss of the submarine.

Tragic as was the fate of the crew of the F-4, it is the hope of navy officials that out of the tragedy will grow betterments in the submarine service.

Secretary Daniels today copies of the report of the board of inquiry would be sent to all submarine officers and to other high officers of the navy. However, copies will be sent to the Naval War College.

Submarine Builder Blames Sailors For Sinking of the F-4

Improper handling, and not corrosion of a rivet in a ballast tank, caused the loss of the submarine F-4, according to a statement issued by Henry R. Carse, president of the Electric Boat Company, which built the vessel.

Immediately upon receiving a copy of the report of the naval board, which investigated the disaster, President Carse and the expert submarine constructors analyzed it. In the findings of the board they discovered this statement: "Air valves found open on forward main, middle main auxiliary, and after main ballast tank." This report by the naval board concerning the finding of open valves convinced the experts that the boat was doomed from the moment she was submerged with the open valves.

President Carse telegraphed a statement to the Washington representative of the Electric Boat Company, which follows in part: "Lining and corrosion of rivets would indicate lack of care. All vessels and machinery are liable to corrosion, and should be regularly overhauled, cleaned and painted. A similar experience in connection with battery tanks was met some time before the loss of the F-4, in connection with one of the E boats on the Atlantic coast.

"Measures are now being taken to guard against such a recurrence. The nature of boats now in service. While this corrosion may possibly have been a contributing cause to the accident, it is not the main cause, as it is always possible to detect such leaks and bring the boat to the surface before serious damage is done.

"The propellers on the F-4 were an improved design on those used on previous boats.

"The question of air valves having been found open on the forward, middle, and after main ballast tank and the auxiliary ballast tank will account for the loss of the vessel.

"When a submarine is properly handled these valves are only open sufficiently long for the air to escape from the ballast tanks when the tanks are being filled. Immediately after filling the tanks the valves must be closed. If they are not closed it is impossible to blow ballast from the tanks and allow the boat to rise to the surface.

"In case a boat is carelessly trimmed and in case she should spring a leak or have a collision with a reef or any submerged object she is doomed unless these valves are closed.

"In the foregoing remarks there is no intention of reflecting on the unfortunate men who lost their lives in the vessel, but the fact that these valves were left open must not be overlooked."

Dr. McLaughlin's Leave Is Extended One Year

Acting Secretary of the Treasury Mahburn has extended for one year the leave of absence of Surgeon Allen J. McLaughlin, of the Public Health Service, to enable him to continue his work as commissioner of health of Massachusetts.

Dr. McLaughlin's leave had expired. Treasury officials desire to retain his services for the Public Health Service, so that he may return when his term of office in Massachusetts expires.

White Plains Observes Its Battle Anniversary

WHITE PLAINS, N. Y., Oct. 28.—White Plains is to celebrate today the anniversary of the battle of White Plains. Arrangements have been completed for the unveiling of the monument on Battle Hill. It will be followed by a banquet, dinner, and speeches, and to top the celebration there is to be a big dance.

The monument is a reproduction of the one at the battle of the Clouds. It is to be unveiled by one of the cannon from the warship. It is to be unveiled by one of the cannon from the warship. It is to be unveiled by one of the cannon from the warship.

"Sells" Astor House Under the Hammer

Young Woman Conducting Broadway Auction Promised Million by Policeman.

NEW YORK, Oct. 28.—A fashionably dressed young woman mounted a soap box at Forty-fifth street and Broadway today and endeavored to sell the Hotel Astor to the bidding bidders by the name of "Come on, you pikers," she said, "what am I bid for this billion-dollar edifice for physical comfort?"

"I'll give you a million if you'll go to my office," said Patrolman Loebe. "Sold!" said the woman and accompanied him to the station house.

Believe physicians said she was mentally unbalanced.

MILK INSPECTORS GO TO VISIT MT. VERNON

Morning Session of Convention Postponed to Permit Pilgrimage to Estate.

The International Association of Dairy and Milk Inspectors postponed the morning session of its convention today to make a pilgrimage to Mt. Vernon and the tomb of George Washington.

Special cars were provided for the delegates, who left the Mt. Vernon station at 10 o'clock, and will remain on the estate until after noon, inspecting the mansion and grounds, and paying particular attention to the stables and cow sheds.

The program that has been prepared for the afternoon session includes several of the addresses which the lack of time prevented the delegates hearing yesterday. Dr. J. R. Thompson, of Waterloo, Iowa, who was to read a paper on the methods of appointment of dairy and milk inspectors, and E. F. Burke, of Albany, who was to read a paper on the legislation and legal limits for the control of milk and cream, were unable to attend.

Alfred Lombard, of the Massachusetts State board of agriculture, will read a paper this afternoon on the value of the dairy industry. Mr. Lombard, who is president of the American Dairy Association, will also address the delegates on regulations for milk and cream.

Dr. D. W. Mack, milk inspector of Portland, Ore., will talk to the delegates on the methods he has employed and results obtained in the milk supply of Portland and Dr. Carl Albers, chief of the Bureau of Chemistry, U. S. Department of Agriculture, will address the convention on the policy of his bureau with regard to milk and dairy inspection.

The standardization of milk on the market and the grading of its quality formed the topic of the address of Dr. John Anderson, of the American Public Health Association, during the presentation of what the delegates called a "test" program last evening.

In addition to Dr. Anderson, speakers were Ernest Kelly of the dairy division of the Bureau of Animal Industry, Department of Agriculture, and Dr. J. W. Kerr, assistant surgeon general of the United States Public Health Service.

Dr. Anderson declared that fixed standards of milk are absolutely essential to the proper control of the product. He said that the objects of the dairy inspectors are to protect the health of the community by the inspection of the milk supply. He advocated a standard of quality and price, and an absolute adherence to the standard.

This evening the experts of the Bureau of Animal Industry of the Department of Agriculture will contribute the entire program addresses being scheduled from Dr. A. D. Melvin, chief of the bureau; Dr. John R. Mohler, assistant director; and Dr. E. C. Schroeder, superintendent of the Bureau's experiment station.

GENERAL WOOD ASKS FOR 35,000 OFFICERS

Hopes to Get Many From 40,000 Military School Students.

NEW YORK, Oct. 28.—Maj. Gen. Leonard Wood, commanding the Eastern department of the army, in an address to the members of the Technology Club, discussed the movement for the military instruction of the boys and men of the country in the colleges and at the summer camps. Several of the great universities, among them Harvard, Yale and Princeton, are already considering the proposal to make military instruction part of their courses, while the general staff of the army is working on a plan to standardize the military training in schools of a military character.

General Wood traced the development of the military instruction camps during the last three years, and ended with a tribute to the military school graduates. General Wood said he expected to have three camps next summer, lasting all together three months, during which the training would be of the most intensive sort, averaging nine and a half hours a day under picked instructors from the regular army.

"We have got to make a lot of officers," said General Wood. "I do not think that the people realize how few we have. At the present time, the army in the United States, and the figures include those of the National Guard as well as those of the regular army, do not total more than 11,000 men, whereas for an army of 1,000,000 men we would need at least 35,000."

"I want to see the military schools and other institutions in which military training is offered send at least 1,000 men to these summer camps every year, and I also hope it will be made possible to give many of them a chance to better themselves by serving a year in the regular army as recruits or lieutenants. We have men qualified to make a splendid reserve of officers, and out of all this splendid material we would be able to train a body of men who would be ready for service in the event of need."

"We have more than 40,000 young men receiving some sort of military instruction with army officers as instructors. We have got to standardize that training, and when a man comes out of the colleges we will know what he has done. There are about 8,000 students in the military schools, and if we get as many of these as possible and put them through intensive training, so that they will be able to become first or second lieutenants."

"Large numbers of reserve officers are needed near all cities to attend to the plans of defense, and a man with ten in engineering language and can be carried out by any engineer of small military training. Men of some military training can be trained in the schools of the regular army, and it is a waste of time to take a long time to make a good officer, so it is wise to coordinate the work in the schools as soon as possible."

A request was forwarded to the Public Utilities Commission to the Rhode Island Avenue Citizens' Association, asking an investigation be made into telegraph and express charges in the district.

In a spirited discussion before the association last night, the charge was made that the residents of Pleasant can get baggage hauled from the Union Station to their homes cheaper than persons living out on Rhode Island avenue. The charge was made that the residents of Pleasant are not so far from the rail terminal. It was also said that the telegraph companies charge 25 cents a day for delivering a message to the Rhode Island avenue residents. In excess of the rate for a similar service in other suburbs.

Protest against the proposal of the Chesapeake and Potomac Telephone Company to limit the use of residential telephones to business hours was made by a resolution presented by Daniel C. Vaughn and adopted by the association. The public utilities commission has been instructed to attend the hearing of this question before the Public Utilities Commission.

The association instructed its committee on police and fire protection to take up the matter of securing more police protection for the neighborhood, particularly between 11:30 a. m. and 1 p. m. A meeting will be held early next month to discuss the plan and equipment of the new school it is proposed to build in that section next year.

CHICAGO, Oct. 28.—For nineteen years Joseph Cunningham, a member in various cities in fear that Federal officers were pursuing him for the theft of \$50 in 1906 from the Alexandria, Ind., post office, where his brother was postmaster, and he a clerk.

Joseph surrendered to the Hammond, Ind., police and discovered that no one searched ever before for him. His brother had made good the shortage and has welcomed the lost brother back.

LONDON, Oct. 28.—Occupation by French troops of the Bulgarian village of Firin, near southwestern Bulgaria, was reported, without confirmation, in Athens dispatches today.

The Bulgarians were charged with plundering and burning various Serbian towns they had captured.

Reports of the Serbian recapture of Tsalor were repeated in today's Athens messages.

INDEPENDENCE, Kan., Oct. 28.—Mrs. Edna Marchant, sixteen years old, on trial here charged with shooting and killing her husband, John Marchant, a chemist, last summer. She was found guilty of manslaughter in the third degree after a jury had been out all night.

Sentence will be passed later. She pleaded self-defense.

Widow, 16, Is Guilty Of Killing Husband

ENVOY OF KAISER MAY COME TO U. S.

Prince von Buelow Reported to Be Engaged in Peace Mission.

LONDON, Oct. 28.—The Daily Mail's correspondent at Berlin says: "According to a message from Berlin received at LAUNAU, Prince von Buelow, former imperial chancellor, probably will go to Madrid and then to the United States."

"A prominent Italian personage is reported to have arrived at Lucerne and to have said that Prince von Buelow has asked Italy for a safe conduct to Genoa for his wife, who is an Italian, in order that she may take the nerve cure at Valmont."

The Daily Mail's Rome correspondent learns from a semi-official Spanish source that the report that Prince von Buelow is considering submitting peace proposals through Spain and the United States is entirely without foundation.

SUPPLIES HOT MEAL FOR FIFTEEN CENTS

Organization Backed By Mrs. Burden, Jr., and Mrs. Vanderbilt, Jr., Opens.

NEW YORK, Oct. 28.—Think of getting a steaming hot course dinner, with meat and vegetables and dessert, for 15 cents. Think of getting enough proteins to run one's system overnight for 7 cents. Think of getting a good meal for 15 cents. The People's Kitchen was opened at 438 West Twenty-seventh street by Mrs. James A. Burden, Jr., and Mrs. William J. Vanderbilt, Jr., in connection with the Association for Improving the Condition of the Poor.

The plan is to serve a good meal at a low price to the poor. The kitchen is a large room with a stove and a sink. It is open from 10 a. m. to 10 p. m. The food is prepared by the women of the kitchen. The food is served to the poor. The food is served to the poor.

FORNEY AND "PAL" GO TO PRISON MONDAY

Washington Men, Convicted of Conspiracy, Sentenced to Long Penitentiary Terms.

PITTSBURGH, Oct. 28.—Sentenced to terms in the North Side penitentiary for conspiracy in connection with the felonious assault made upon T. Franklin Schneider last June, Thomas G. Forney and George McHenry, both of Washington, will be placed in their cells Monday, according to arrangements made here today by Sheriff Richards, of Allegheny county, today said it had been decided to confine the men in the old penitentiary instead of the new institution.

Forney will serve not less than four nor more than eight years, according to his conduct and the judgment of the warden. McHenry was sentenced to serve not more than five nor less than three years. H. C. Carlisle, another Washington man, was today taken to the Allegheny county jail, where he will serve six months.

Forney's cool, calm, deliberate manner while on the stand detailing the plot to kill his father-in-law was the subject of much comment by court attaches and spectators today. He recited all the gruesome arrangements made by himself and his alleged co-conspirators in the matter of forcing his way into the Allegheny county jail, where he will serve six months.

Schneider, the Washington capitalist, who was the victim of the plot, followed the story closely and with deep interest and riveted his eyes upon his father-in-law. When Forney calmly announced that it was his intention to have Schneider killed, the father-in-law turned his eyes from the witness stand and seemed to shudder.

Although McHenry, like Forney, entered a plea of guilty, he stated on the stand that he did not intend killing Schneider. He said such was his original agreement and intention, but after reaching Pittsburgh he changed his mind. He said, "I made up my mind that I would not kill Mr. Schneider. I simply wanted to have a mighty good time on Forney's soft money without carrying out his plot to end anybody's life."

Enrollment Increases In Classes At Y. M. C. A.

Marked increase in the enrollment in the newly organized class for business men and private secretaries at the Washington Y. M. C. A. followed the first talk by Arthur Deane Call, on Tuesday evening. The next lecture is to be given next Tuesday evening.

The plan of the course is unique. It deals especially with English needed by men in these callings. Mr. Call, who is giving the course, is director of the American Peace Society and was for some years superintendent of schools in Hartford, Conn. He is a lecturer on education at George Washington University, and is a contributor to magazines.

EAT IT! ENJOY IT! NO INDIGESTION OR BAD STOMACH

Never any sour, gassy or acid stomach, heartburn or dyspepsia.

"Pape's Diapiesin" makes weak stomachs strong and healthy at once.

Headaches from the stomach are absolutely unknown where this effective remedy is used. Diapiesin really does all the work of a healthy stomach. It digests your meals when your stomach can't. A single dose will digest all the food you eat and leave nothing to ferment or sour and upset the stomach.

Get a large 10-cent case of Pape's Diapiesin from your druggist and start taking now. It is a little while you will actually brag about your healthy, strong stomach, for you can eat anything and everything you want without the slightest discomfort or misery, and every particle of impurity and gas that is in your stomach and intestines is going to be carried away without the use of laxatives or any other assistance.

Should you at this moment be suffering from indigestion or any other disorder, you can get relief within five minutes.—Advt.

PLATTSBURG TRUCKS REACH WASHINGTON

Autocars Used in Camp For Maneuvers As Well As For Lighting Ranges.

The Autocar trucks that were used at the military instruction camps at Plattsburg are in Washington.

These cars attracted widespread attention among the regular army officers and business men who attended the camps. The quartermaster in charge of the camps estimated, after careful study, that one truck could displace five four-mile teams.

Never before in this country have motor vehicles had a more thorough military demonstration—on the hikes and maneuvers at Plattsburg conditions approximated the actual service of war.

Relief for Catarrh Sufferers Now FREE

You Can Now Treat This Trouble in Your Own Home and Get Relief at Once.

How the Remedy for Catarrh Was Discovered.

THIS terrible disease has raged unchecked for years simply because symptoms have been treated while the vicious germs that cause the trouble have been left to circulate in the blood, and bring the disease back as fast as local treatments could relieve it.

C. E. Gauss, who experimented for years on a treatment for Catarrh, found that after perfecting a balm that relieved the nose and throat troubles quickly, he could not prevent the trouble beginning all over again.

On test cases, he could completely remove all signs of Catarrh from nose and throat, but in a few weeks they were back.

Removes the Cause and Immediately Gives Relief to the Nose and Throat

Reese Jones, of Scranton, Penn., says that after trying many other treatments, he used this new method and—"My nose is now entirely clear and free and I am not bothered by the disease any more. The New Combined Treatment is worth its weight in gold."

Temporary relief from catarrh may be obtained in other ways, but the New Combined Treatment must inevitably be accepted for permanent results.

Send to C. E. Gauss, Mount Pelion, Tenn., 3000, I suffered the pains and distress of catarrh for thirteen years and needless to say, tried nearly every remedy. But by your new method I was completely cured and you cannot imagine the joy that has come to me.

Send no money, take no risks, make no promises. Simply cut, scan and mail the coupon to C. E. Gauss, Mount Pelion, Tenn. Your combined treatment will be sent, fully prepaid, together with the valuable book on "Catarrh."
